- Finnish (Fluent)
- English (Fluent)
- German (Basics)
- Russian (Basics)

PROFILE

Game technology student, 21, currently in my first year of a Bachelor of Engineering in Game Tech. I've been into tech since 15, starting with building my first PC and pursuing game development ever since. I already have hands-on industry experience from working in a game startup as a 3D modeller and animator. I'm now looking for a job to gain further real-world experience and financial stability. I communicate clearly, work well with others, and approach problems with a critical, practical mindset.

WORK EXPERIENCE

Astral Adventura 2025 -
3D Modeler & Animator

- Environmental modeling and Character modeling
- Character animations, including locomotion, and interaction.
- Teamwork skills strengthened.

Demande 2024 -
Gigs

- Gig based work.
- Mostly tech support.
- Support for executives and representatives.

Finnish Defence Forces 1.2024 - 9.2024
Simulator Conscript

- Developing, maintenance and technical support for various simulators and systems in the FDF.
- Programming & 3D Modeling
- Support for various ranks, from conscripts to higher rank officers.
- Gained knowledge on how to effectively work in a team.
